RE: Uranium Mines  
Oil and Grease Treatment

Dear Mr. Blubaugh:

This Bureau has reviewed the Atlas Minerals NPDES self-monitoring reports for the ~~Velva~~ and ~~Elva~~ mines. Although your January 28, 1983 letter indicates oil and grease removal devices have been installed, our files fail to indicate that Atlas has submitted any recent plans. We wish to remind you that any industrial wastewater treatment system of this nature must be approved by this office.

Therefore we request that the following additional information be submitted by March 31, 1983:

1. Detail drawing of the original oil and grease baffle or submerged inlet. Our January 19, 1981 and August 19, 1981 construction permits required that such devices be installed.
2. Detailed plans and description of the recently installed oil and grease removal devices.
3. Dates which the oil and grease removal devices were installed.

If you have any questions regarding the requested information, you may contact Steven McNeal at 533-6146.

Sincerely,

Fredrick C. Pehrson, P.E., Chief
